

Table S3. Results of zero inflated negative binomial model testing effects of survey timepoint, species, and their interaction on total coral count in transect surveys, with *Madracis decactis* and *Helioseris cucullata* included.

Effect	Chisq	df	Pr(> Chi)	sig
Survey	12.843	2	0.002	**
Species	275.838	15	<0.001	***
Survey x Species	50.063	30	0.012	*
