

Table 1. Results of zero inflated negative binomial model testing effects of survey timepoint, species, and their interaction on total coral count in transect surveys.

Effect	Chisq	df	Pr(> Chi)	sig
Survey	12.532	2	0.002	**
Species	229.571	13	<0.001	***
Survey x Species	46.993	26	0.007	**
